

BS 4584 : Part 8 : 1972

UDC 621.39.049.75 : 217.678.086 : 119

Specification for
**Metal-Clad
Base Materials for
Printed Circuits**

**Part 8: Phenolic cellulose paper
copper-clad laminated sheet of high
electrical quality, flame retardant grade:
PF-Cu-8**

ISBN: 0 580 07443 9

Copyright

Users of British Standards are reminded that copyright subsists in all BSI publications. No part of this publication may be reproduced in any form without the prior permission in writing of BSI. This does not preclude the free use, in the course of implementing the standard, of necessary details such as symbols and size, type or grade designations. Enquiries should be addressed to the BSI Secretariat.

Contract requirements

Attention is drawn to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

Revision of British Standards

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions. Full information on all BSI publications, numbering over 6000, will be found in the *British Standards Yearbook*. This information is supplemented by details published each month in *BSI News* of new publications, revisions and amendments.

BSI News is available to Subscribing Members of the Institution. All other publications may be purchased direct from Sales Department. Enquiries concerning subscribing membership, which has considerable advantages, will be welcomed, and should be made to Subscriptions Department. Both departments are located at:

101 Pentonville Road, London N1 9ND (Telephone 01-837 8801: Telex 23218).

The following BSI references relate to the work on this standard:
Committee references TLE/19 and TLE/19/1 Draft for comment 70/9525
Word Processing Centre reference ZZ707

CO-OPERATING ORGANIZATIONS

The Telecommunication Industry Standards Committee, under whose supervision this British Standard was prepared, consists of representatives from the following Government departments and scientific and industrial organizations:

British Broadcasting Corporation	Cable and Wireless Limited
British Electrical and Allied Manufacturers' Association	Crown Agents for Oversea Governments and Administrations
*British Radio Equipment Manufacturers' Association	Department of Employment and Productivity (HM Factory Inspectorate)
British Radio Valve Manufacturers' Association	Department of Trade and Industry
British Railways Board	Electrical Contractors Association (Incorporated)

7. Flexural strength and flammability requirements	7

FOREWORD

This Part of the British Standard deals with material designated PF-CP-Cu-8. The letters PF denote phenolic resin, CP denotes cellulose paper, Cu denotes copper, and 8 is a serial number.

At present International Electrotechnical Commission (IEC) Publication 249-2, 'Metal-clad base materials for printed circuits', Part 2 : 'Specifications', does not contain a grade of base material equivalent to PF-CP-Cu-8.

The requirements given in this British Standard will be covered by a quality assessment procedure that is in course of preparation, and which will be issued as a Part of this standard at a later date.

The methods of test referred to in this standard are given in BS 4584 : 1970, 'Metal-clad base materials for printed circuits', Part 1, 'Methods of test'.
