This British Standard, having been approved by the Personal Safety Equipment Standards Committee, was published under the authority of the Executive Board on 14 July, 1970.

SBN : 580 06081 0

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 5000, fully indexed and with a note of the contents of each, will be found in the British Standards Yearbook, price £1. The BS Yearbook may be consulted in many public libraries and similar institutions.

This standard makes reference to the following British Standards:

BS 1006. Determination of fastness to daylight of coloured textiles.

BS 2661-86 & 3661. Methods for the determination of the colour fastness of textiles; *also*: Addendum No. 1 (PD 4957 : 1953).

and Addendum No. 2 : 1967.
BS 2782. Methods of testing plastics.
BS 3424. Methods of test for coated fabrics.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.

The following BSI references relate to the work on this standard:
Committee reference PSM/23 Draft for comment 69/17423
