**TELEGRAMS: STANDARDS AUDLEY LONDON**

**TELEPHONE: MAYFAIR 9000**

THIS BRITISH STANDARD, having been approved by the Fire Standards Committee and endorsed by the Chairman of the Building Divisional Council, was published under the authority of the General Council on 28th November, 1958.

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 4000, indexed and cross-indexed for reference, together with an abstract of each standard, will be found in the Institution's Yearbook, price 15s.

This standard makes reference to the following British Standard:

B.S. 476, Part 1 Fire tests on building materials and structures.

*British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.*

The following B.S.I. references relate to the work on this standard:—  
Committee reference FSB/1      Draft for comment CX(FSB) 7023

## CO-OPERATING ORGANIZATIONS
