Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Textiles and Clothing Standards Committee (TCM/-) to Technical Committee TCM/32, upon which the following bodies were represented:

- British Carpet Manufacturers' Association Ltd
- City of Bradford Conditioning House
- Confederation of British Wool Textiles Limited
- Institute of Trading Standards Administration
- International Wool Secretariat
- Man-made Fibres Producers' Committee
- Textile Research Council

This British Standard, having been prepared under the direction of the Textiles and Clothing Standards Committee was published under the authority of the Board of BSI and comes into effect on 29 January 1988

© BSI 12-1999

First published as BS 4784 February 1973
First revision in Parts Part 2 January 1988

National foreword

This British Standard has been prepared under the direction of the Textiles and Clothing Standards Committee and forms a Part revision of BS 4784 “*Method for the determination of the correct invoice mass (weight) of textiles*” which is withdrawn.

This Part of BS 4784 is identical with ISO 6741-2 “*Textiles — Fibres and yarns — Determination of commercial mass of consignments — Part 2: Methods for obtaining laboratory samples*”, published in 1987 by the International Organization for Standardization (ISO).

The International Standard comprises four Parts as follows:

- ISO 6741-1, *Mass determination and calculations.*
- ISO 6741-2, *Methods for obtaining laboratory samples.*
- ISO 6741-3, *Specimen cleaning procedures.*
- ISO 6741-4, *Values used for commercial allowances and the commercial moisture regains.*

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” and “part of ISO 6741” appear, referring to this standard, they should be read as “British Standard” and “Part of BS 4784”, respectively.

Cross-references

International Standard	Corresponding British Standard
ISO 6348:1980	BS 1051:1981 <i>Glossary of terms relating to the conditioning, testing and mass determination of textiles (section 2)</i> (Technically equivalent)
ISO 6741-1:1987	BS 4784 <i>Methods for determination of commercial mass of consignments of textiles</i> Part 1:1988 <i>Mass determination and calculations</i> (Identical)

ISO 6741-4:1987 to which reference is made in the text is reproduced as national Appendix A of BS 4784-1:1988.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
