

Specification for

**50 g/m² nylon
parachute fabric**

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Aerospace Standards Policy Committee (ACE/-) to Technical Committee ACE/54, upon which the following bodies were represented:

- British Fabric Association
- British Rubber Manufacturers' Association
- British Textile Employers' Association
- Man-made Fibres Producers' Committee
- Ministry of Defence
- Society of British Aerospace Companies Ltd.
- Society of Dyers and Colourists

This British Standard, having been prepared under the direction of the Aerospace Standards Policy Committee, was published under the authority of the Board of BSI and comes into effect on 28 September 1990

Foreword

This British Standard, prepared under the direction of the Aerospace Standards Policy Committee, is one of a series for textiles of a quality suitable for aerospace purposes, and is a revision of BS 3F 118:1980 which is withdrawn. During its preparation account has been taken of the fact that the term “permeability” is now used in place of “porosity”, and metric units for this property are included for the first time. Quality requirements as defined in the latest edition of BS F 100 are also included, as are details of information to be supplied by the purchaser and a test for heat strength loss.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
