Foreword

This British Standard, one of a series for textiles of a quality suitable for aeronautical purposes, is a revision of BS 3F 33 which, withdrawn in 1947 as obsolete, is now reintroduced to meet a revival of demand.

During the revision minor changes only have been made to the technical requirements, but the standard now provides for the rope to be rot-proofed and to be identified by a code reference. Metric equivalents of British units are given in an Appendix; the figures in British units are to be regarded as the standard.

This standard makes reference to the following standards:

BS F 100, *Inspection and testing procedures for textiles for aeronautical purposes.*

BS 2087, *Chemical requirements for textiles treated by certain preservative processes.*

Obsolescent (by Amendment No. 1).

The need for the material covered by this British Standard has been reviewed and it has been decided that, in the interests of rationalization, it should be regarded as obsolescent and not therefore used for new designs. The standard will be withdrawn in due course.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 and 2 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date of issue	Comments
4335	September 1983	Indicated by sideline in the margin

This British Standard, having been approved by the Aircraft Industry Standards Committee and endorsed by the Chairman of the Engineering Divisional Council, was published under the authority of the General Council of the Institution on 9 October 1961
