Foreword

This code of practice has been prepared under the direction of the Clothing Standards Committee at the request of representatives of consumer bodies, retailers and the footwear industry with the object of regularizing procedures for those wear trials of footwear designed to evaluate new making processes, materials and components, design and constructional features, styles, etc., by direct comparison with footwear of an established performance.

Typically, such a wear trial is used to evaluate a new upper or soling material, to relate wear performance and characteristics to laboratory testing results or to determine the effect of a change of component or other process variation.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 and 2 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Clothing Standards Committee, was published under the authority of the Board of BSI and comes into effect on 30 November 1981
