Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee CPL/34/9, Emergency lighting, upon which the following bodies were represented:

- Association of British Theatre Technicians
- Association of Building Engineers
- Association of County Councils
- Association of Manufacturers of Power Generating Systems
- British Cable Makers Confederation
- British Fire Consortium
- Chartered Institution of Building Services Engineers
- Chief and Assistant Chief Fire Officers Association
- Cinema Exhibitors Association
- Department of the Environment, Transport and the Regions
- Department of Trade and Industry — Consumer Safety Unit, CA Division
- District Surveyors Association
- Electrical Contractors Association
- Electricity Association
- Engineering Industries Association
- GAMBICA (BEAMA Ltd.)
- Home Office
- Industry Committee for Emergency Lighting Ltd. (ICEL)
- Institute of Fire Prevention Officers
- Institute of Fire Safety
- Institution of Electrical Engineers
- Institution of Lighting Engineers
- Lighting Industry Federation Ltd.
- London Transport
- National Illumination Committee of Great Britain
- National Inspection Council for Electrical Installation Contracting
- Photoluminescent Safety Products Association
- Tenpin Bowling Proprietors Association

This British Standard, having been prepared under the direction of the Electrotechnical Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 October 1999

Foreword

This part of BS 5266 has been prepared by Technical Committee CPL/34/9, Emergency Lighting.

This standard is supplementary to, and is intended to be used as an addition to, BS 5266-1.

The aim of this standard is to promote wider understanding of non-electrical low mounted way guidance systems, to encourage uniformity of application and to give advice on their most effective use within buildings.

Owing to the developing nature of the technology, a review of this part of BS 5266 will commence three years after the date of publication, as opposed to the usual five early review period.

Annex A is informative. Annex B is normative.

As a code of practice, this British Standard takes the form of guidance and recommendations. It should not be quoted as if it were a specification and particular care should be taken to ensure that claims of compliance are not misleading.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.
