

Specification for

Hand crimping tools for the termination of electrical cables and wires for low frequency and radio frequency applications —

**Part 2B: Hand crimping tools
(removable and interchangeable dies,
sizes A to G and Q to S) for radio
frequency connectors and concentric
contacts**

Cooperating organizations

The Electronic Components Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following:

- British Electrical and Allied Manufacturers' Association (BEAMA)
- Electricity Supply Industry in England and Wales
- Electronic Components Industry Federation*
- Electronic Engineering Association*
- Institution of Electronic and Radio Engineers
- Ministry of Defence*
- National Supervising Inspectorate*
- Post Office*
- Society of British Aerospace Companies Limited*
- Telecommunication Engineering and Manufacturing Association (TEMA)

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the Technical Committee entrusted with the preparation of this British Standard:

- Association of Manufacturers Allied to the Electrical and Electronic Industry (BEAMA)
- Department of Industry (British Calibration Service)
- United Kingdom Atomic Energy Authority

This British Standard, having been prepared under the direction of the Electronic Components Standards Committee, was published under the authority of the Executive Board and comes into effect on 29 May 1981

Foreword

This Part of this British Standard has been prepared under the direction of the Electronic Components Standards Committee. Part 1 of this British Standard provides general requirements and tests for hand crimping tools for the termination of electrical cables and wires for low frequency and radio frequency applications. Part 2 of the standard is subdivided into Part 2A (already published), Part 2B (this standard) and Part 2C (in course of preparation).

Part 2A covers hand crimping tools with fixed dies, sizes A to E, for radio frequency crimped type connectors such as those listed in radio frequency connector detail specifications based on BS 9210.

Part 2B covers hand crimping tools and with removable and interchangeable dies, sizes A to G and Q to S, for radio frequency crimped-type connectors.

Part 2C will cover dies of larger section in addition to some further dies of up to size K with the same section as those given in Part 2B.

Certification. Attention is drawn to the certification facilities described on the inside back cover of this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
