Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Light Electrical Engineering Standards Committee (LEL/-) to Technical Committee LEL/161, upon which the following bodies were represented:

Association of Control Manufacturers — TACMA (BEAMA Ltd.)	Electric Cable Makers' Confederation
Association of Manufacturers of Domestic Electrical Appliances	Electrical Association for Women
British Electrotechnical Approvals Board	Electrical Installation Equipment Manufacturers Association (BEAMA Ltd.)
British Gas Corporation	Electricity Supply Industry in England and Wales
British Lawn Mower Manufacturers' Federation	Fire Protection Association
British Retailers' Association	Home Office
Catering Equipment Manufacturers' Association	Institution of Electrical Engineers
Consumer Standards Advisory Committee of BSI	Lighting Industry Federation Ltd.
Consumers' Association	Ministry of Defence
Department of Energy (Electricity Division)	Portable Electric Tool Manufacturers' Association
Department of Trade and Industry (Consumer Safety Unit, CS Division)	Rotating Electrical Machines Association (BEAMA Ltd.)
ERA Technology Ltd.	Small Electrical Appliances Marketing Association
Economic Development Council	South of Scotland Electricity Board

The following bodies were also represented in the drafting of the standard, through subcommittees and panels:

Asbestos Removal Contractors' Association	Health and Safety Executive
Association of High Pressure Water Jetting Contractors	Industrial Cleaning Machine Manufacturers' Association (BEAMA Ltd.)
Department of Health and Social Security	Scottish Health Services

This British Standard, having been prepared under the direction of the Light Electrical Engineering Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 October 1986

Foreword

This Supplement to BS 5415-2.2 has been prepared under the direction of the Light Electrical Engineering Standards Committee. It replaces appendix CC of BS 5415-2.2:1976, which is withdrawn.

This Supplement specifies the additional requirements for type H industrial vacuum cleaners suitable for the collection of non-explodable dusts hazardous to health. It should be read in conjunction with both BS 5415-1 and BS 5415-2.2.

The decision to issue this Supplement separate from Section 2.2 was taken in anticipation of the publication of IEC texts to cover the scope of the rest of BS 5415-2.2 which, if acceptable, will be used as the basis of new dual numbered British Standards. It is not expected that requirements covering the collection of non-explodable dusts hazardous to health will be covered in IEC publications in the foreseeable future. Hence the need to retain a separate Supplement as a national standard, to be called up when appropriate.

In this Supplement, clause numbers relate to clause numbers in BS 5415-2.2.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i to iv, pages 1 to 8, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
