

Road lighting —

Part 6: Code of practice for lighting for bridges and elevated roads

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Electrical Illumination Standards Policy Committee (LGL/-) to Technical Committee LGL/23, upon which the following bodies were represented:

- Automobile Association
- British Lighting Association for the Preparation of Standards (Britlaps)
- British Precast Concrete Federation Ltd.
- Chartered Institution of Building Services Engineers
- Council for the Protection of Rural England
- County Surveyors' Society
- Department of Transport
- Institution of Civil Engineering Surveyors
- Institution of Civil Engineers
- Institution of Electrical Engineers
- Institution of Lighting Engineers
- Institution of Mechanical Engineers
- Lighting Industry Federation Ltd.
- Royal Fine Art Commission
- Scottish Office (Building Directorate)

This British Standard, having been prepared under the direction of the Electrical Illumination Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 August 1992

Foreword

This Part of BS 5489 has been prepared under the direction of the Electrical Illumination Standards Policy Committee and is a new edition of BS 5489-6:1990 which is withdrawn.

The 1990 edition drew attention to problems in and considerations that should be given to, the design of lighting installations for bridges and elevated roads. The recommendations made in other Parts of BS 5489 should apply, as appropriate, to bridges and elevated roads but deviations may be necessary to meet special conditions imposed by structural design or traffic. It is essential that individual cases are considered on their merits and for this reason it is not possible in this code to suggest optimum solutions or to make detailed recommendations.

The 1990 edition did accommodate modern aesthetic values and technical capabilities.

This edition incorporates editorial improvements but it does not reflect a full review or revision of the standard, which will be undertaken in due course.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
