

Powder metallurgical materials and products —

Part 3: Methods of testing sintered metal materials and products, excluding hardmetals —

Section 3.9 Determination of radial crushing strength for sintered metal bushes

UDC 621.762:669-138.8:620.173.22:621.887.7

Foreword

This Section of BS 5600 is technically equivalent to ISO 2739 “*Sintered metal bushes — Determination of radial crushing strength*” and supersedes the related method of test specified in 1.10.3 of BS 2590-1:1969.

The application of the method of test is considered in the United Kingdom not to be applicable to hardmetals, and statements indicating the exclusion of hardmetals have been included in the text of this Section.

In other respects the text of the International Standard has been approved as suitable for publication as a British Standard. For ease of production the text of the International Standard has been used as the basis of this Section; some terminology and certain conventions are therefore not identical with those used in British Standards.

Additional information. This Section is one of a series that comprises BS 5600. A list of the Sections of BS 5600 appears in Table 1 of the introduction and contents (Section 1.1).

Section 1.2 is a glossary of technical terms that have particular application in the powder metallurgical industry and which are used in the Sections of this British Standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 and 2, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date of issue	Comments

This British Standard, having been prepared under the direction of the Iron and Steel Standards Committee, was published under the authority of the Executive Board and comes into effect on 28 February 1979
