Cooperating organizations

The Power Electrical Engineering Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following Government departments and scientific and industrial organizations:

- Associated Offices Technical Committee
- Association of Short Circuit Testing Authorities
- British Electrical and Allied Manufacturers Association (BEAMA)
- British Railways Board*
- British Steel Corporation
- Department of Energy — Electricity
- Electrical Contractors' Association
- Electrical Contractors' Association of Scotland
- Electrical Research Association
- Electricity Supply Industry in England and Wales*
- Engineering Equipment Users' Association*
- Institution of Electrical Engineers
- Ministry of Defence
- National Coal Board*
- Trades Union Congress

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

- Association of Consulting Engineers
- Engineer Surveyors' Association
- London Transport Executive
- The Transmission & Distribution Association (BEAMA)

This British Standard, having been prepared under the direction of the Power Electrical Engineering Standards Committee, was published under the authority of the Executive Board on 31 October 1978

Cooperating organizations	Inside front cover
National foreword	ii
1 Scope	1
2 Selection of a tap-changer	1
2.1 General remarks	1
2.2 Insulation level	1
2.3 Current	1
2.4 Breaking capacity	2
2.5 Number of tapping positions	2
2.6 Discharge problems with change-over selectors	2
2.7 Mechanical life	2
2.8 Motor-drive mechanism	2
2.9 Pressure and vacuum tests	2
2.10 Low-temperature conditions	2
2.11 Continuous operation	3
3 Location of oil-immersed tap-changer components	3
3.1 Tap selectors	3
3.2 Diverter and selector switches	3
3.3 Oil level alarm contacts	3
4 Field service	3
4.1 Safety of operation	3
4.2 Parallel operation	3
4.3 Contact erosion and oil contamination	3
5 Information required with enquiry or order	3
5.1 Rating and general data	3
5.2 Insulation level	4
5.3 Pressure, vacuum and temperature requirements	4
5.4 Special	4
5.5 Fittings	4
5.6 Motor-drive mechanism	4
