

Measurement of flow of cold potable water in closed conduits —

Part 6: Test methods for combination meters

UDC 532.57:532.542:628.1.033

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Industrial-process Measurement and Control Standards Policy Committee (PCL/-) to Technical Committee PCL/2, upon which the following bodies were represented:

- British Compressed Air Society
- British Gas plc
- Department of Trade and Industry (Gas and Oil Measurement Branch)
- Department of Trade and Industry (National Engineering Laboratory)
- Electricity Association
- Energy Industries Council
- Engineering Equipment and Materials Users' Association
- GAMBICA (BEAMA Ltd.)
- Institute of Measurement and Control
- Institute of Petroleum
- Institute of Trading Standards Administration
- Institution of Gas Engineers
- Institution of Mechanical Engineers
- Society of British Gas Industries
- Water Research Centre
- Water Services Association of England and Wales

The following body was also represented in the drafting of the standard, through subcommittees and panels:

- Department of Trade and Industry (National Weights and Measures Laboratory)

This British Standard having been prepared under the direction of the Industrial-process Measurement and Control Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 May 1993

National foreword

This Part of BS 5728 has been prepared under the direction of the Industrial-process Measurement and Control Standards Policy Committee. It is identical with ISO 7858-3:1992 *Measurement of water flow in closed conduits — Meters for cold potable water — Combination meters — Part 3: Test methods*, published by the International Organization for Standardization (ISO). This is Part 6 of a series of Parts of BS 5728 on the measurement of flow of cold potable water, as follows:

- *Part 1: Specification for single meters;*
- *Part 2: Specification for installation requirements for single meters;*
- *Part 3: Methods for determining principal characteristics of single meters (including test equipment);*
- *Part 4: Specification for combination meters;*
- *Part 5: Specification for installation requirements for combination meters.*

NOTE Copies of OIML Recommendations may be purchased from, BIML, 11 rue Turgot, 75009 Paris, France.
