free and total carbohydrate contents by
high performance anion-exchange
chromatography**

ICS 67.140.20

National foreword

This British Standard reproduces verbatim ISO 11292:1995 (corrected and reprinted in 1997) and implements it as the UK national standard. It supersedes BS 5752-15:1995 which is withdrawn. This new edition includes new informative references in Annex B. The International Standard has been amended to reflect the technical content of the 1995 British Standard.

This standard embodies an agreement, to which the UK was a party, reached in Subcommittee 15, Coffee, of Technical Committee 34, Agricultural food products, of ISO.

The UK participation in its preparation was entrusted to Technical Committee AW/15, Coffee, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
