National foreword

This British Standard reproduces verbatim ISO 14718:1998 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee AW/10, Animal feeding stuffs, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 12 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments

This British Standard, having been prepared under the direction of the Consumer Products and Services Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 May 1999

Animal feeding stuffs — Determination of aflatoxin B₁ content of mixed feeding stuffs — Method using high-performance liquid chromatography

*Aliments des animaux — Détermination de la teneur en aflatoxine B₁ dans
les aliments composés — Méthode par chromatographie liquide à haute
performance*

Contents

	Page
Foreword	iii
1 Scope	1
2 Normative reference	1
3 Principle	1
4 Reagents and materials	1
5 Apparatus	3
6 Sampling	5
7 Preparation of the test sample	5
8 Procedure	5
8.1 General	5
8.2 Determination of the absorption spectrum of the aflatoxin B ₁ standard solution	6
8.3 Extraction	6
8.4 Clean-up	6
8.4.1 Florisil® purification	6
8.4.2 C ₁₈ purification	6
8.5 High-performance liquid chromatography	7
8.5.1 General	7
8.5.2 HPLC pump settings	7
8.5.3 Post-column pump settings for HPLC with iodine derivatization	7
8.5.4 Fluorescence detector	7
8.5.5 Injector	7
8.5.6 Check of chromatographic separation	7
8.5.7 Check of the stability of the system	7
8.5.8 Check of linearity	7
8.5.9 Injection of sample extracts	7
9 Calculation of results	8
9.1 Calculation of the aflatoxin B ₁ content of the aflatoxin B ₁ standard solution	8
9.2 Calculation of the mass of aflatoxin B ₁ in the injected reference calibration solution	8
9.3 Calculation of the mass of aflatoxin B ₁ in the test solution	8
9.4 Calculation of the aflatoxin B ₁ content of the sample	8
10 Accuracy	8
10.1 Systematic error	8
10.2 Precision	9
10.2.1 Interlaboratory test	9
10.2.2 Repeatability	9
10.2.3 Reproducibility	9
11 Test report	9
Annex A (informative) Results of interlaboratory test	10
Annex B (informative) Equivalence of iodine and bromine derivatization	10
Figure 1 — Diagrammatic representation of the HPLC system for derivatization with iodine	4
Figure 2 — Diagrammatic representation of the HPLC system for derivatization with bromine	4
Table A.1 — Statistical results of the interlaboratory test of the method applying derivatization with iodine	10
Table A.2 — Summary of the published statistical results of the interlaboratory test	10
Table B.1 — Statistical results of interlaboratory tests of the equivalence of iodine and bromine derivatization	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 14718 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*, Subcommittee SC 10, *Animal feeding stuffs*.

Annex A and Annex B of this International Standard are for information only.

Descriptors: Agricultural products, food, animal feeding products, mixtures, chemical analysis, determination of content, aflatoxins, high performance liquid chromatography.
