Foreword

This British Standard has been prepared under the direction of the Electronic Equipment Standards Committee. It is technically equivalent to Publication 569:1977, published by the International Electrotechnical Commission (IEC), although it has been necessary to make some editorial changes to improve the clarity of the standard. Some textual errors also have been corrected.

Copies of the CCIR (International Radio Consultative Committee) Recommendations referred to in this British Standard are available for consultation in the BSI Library, 2 Park Street, London W1A 2BS.

Copies of CCIR publications can be purchased from the International Telecommunications Union, Place des Nations, 1211-Geneva-20, Switzerland.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
