Cooperating organizations

The General Electrotechnical Engineering Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following Government departments and scientific and industrial organizations:

- Associated Offices Technical Committee
- British Approvals Service for Electric Cables Ltd.
- British Electrical and Allied Manufacturers' Association (BEAMA)
- British Radio Equipment Manufacturers' Association
- British Steel Corporation
- Department of Energy (Electricity)
- Electric Cable Makers' Confederation
- Electrical Contractors' Association
- Electrical Contractors' Association of Scotland
- Electrical Research Association*
- Electricity Supply Industry in England and Wales*
- Electronic Components Industry Federation*
- Engineering Equipment Users' Association
- Health and Safety Executive
- Home Office
- Institution of Electrical Engineers
- Ministry of Defence*
- National Coal Board*
- Oil Companies Materials Association
- Post Office*
- Telecommunication Engineering and Manufacturing Association (TEMA)*

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

- Adhesive Tape Manufacturers' Association
- British Paper and Board Industry Federation (PIF)
- Department of Industry (British Calibration Service)
- Department of Industry (National Physical Laboratory)
- Electrical and Electronic and Insulation Association (BEAMA)
- Rotating Electrical Machines Association (BEAMA)
- The Transmission and Distribution Association (BEAMA)

This British Standard, having been prepared under the direction of the General Electrotechnical Engineering Standards Committee, was published under the authority of the Executive Board and comes into effect on 31 March 1980

National foreword

This British Standard is identical with IEC Publication 112 (third edition) “*Method for determining the comparative and the proof tracking indices of solid insulating materials under moist conditions*” published in 1979 by the International Electrotechnical Commission (IEC). This British Standard is published under the direction of the General Electrotechnical Engineering Standards Committee.

Terminology and conventions. The text of the international standard has been approved as suitable for publication, without deviation, as a British Standard. Some terminology and certain conventions are not identical with those used in British Standards; attention is especially drawn to the following.

In Figure 1 and Figure 2 the comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

The page numbers in the text refer to the IEC page numbers.

Cross-references

International standard ^a	Corresponding British Standard
IEC 587:1977	BS 5604:1978 <i>Method of test for evaluating resistance to tracking and erosion of electrical insulating materials used under severe ambient conditions</i> (Identical)

^a Undated in the text.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
