

Sampling and examination of bituminous mixtures for roads and other paved areas —

**Part 100: Methods for sampling for
analysis**

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Road Engineering Standards Committee (RDB/-) to Technical Committee RDB/36 upon which the following bodies were represented:

- British Aggregate Construction Materials Industries
- British Civil Engineering Test Equipment Manufacturers' Association
- British Tar Industry Association
- County Surveyor's Society
- Department of the Environment (Property Services Agency)
- Department of Transport (Highways)
- Department of Transport (Transport and Road Research Laboratory)
- Institute of Asphalt Technology
- Institute of Petroleum
- Institution of Civil Engineers
- Institution of Highways and Transportation
- Mastic Asphalt Council and Employers' Federation
- Mastic Asphalt Producers' Association
- Refined Bitumen Association Ltd.
- Sand and Gravel Association Ltd.
- Society of Chemical Industry
- Coopted members

This British Standard, having been prepared under the direction of the Road Engineering Standards Committee, was published under the authority of the Board of BSI and comes into effect on 23 December 1987

Foreword

This Part of BS 598 has been prepared under the direction of Technical Committee B/510. It is proposed to confirm this Part of this British Standard after publication of amendment No. 2.

Due to the different factors to be considered when sampling and testing mastics for roads and other paved areas it has been decided to continue publishing the requirements for mastics as a separate British Standard, i.e. BS 5284.

It has been assumed in the drafting of this Part of BS 598 that the execution of its provisions is entrusted to appropriately qualified and experienced people.

It is recognized that safety during sampling is of great importance. It should be noted that the work of sampling may be subject to the provisions of the Health and Safety at Work etc. Act 1974, the Factories Act 1961 (as amended by the Health and Safety at Work etc. Act 1974) and in particular the Construction Regulations 1961 and 1966.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
