National foreword

This Part of BS 6057 is identical with ISO 123:1985 “*Rubber latex — Sampling*” published by the International Organization for Standardization (ISO). It supersedes clause 2 of BS 1672:1972 and clause 3 of BS 3397:1976 which are being deleted by separate amendments.

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following. Wherever the words “International Standard” or “second edition of ISO 123” appear, referring to this standard, they should be read as “Part of BS 6057”. The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Cross-references

International Standard	Corresponding British Standard
ISO 124:1974	BS 6057 <i>Rubber latices</i> Section 3.2:1981 <i>Determination of total solids content of rubber latices</i> (Identical)
ISO 1795:1974	BS 6315:1982 <i>Methods for sampling and sample preparation of raw rubber</i> (Technically equivalent)

The Technical Committee has reviewed the provisions of ISO 3310-1:1982 to which reference is made in the text, and has decided that they are acceptable for use in conjunction with this standard. Attention is drawn to BS 410 “*Specification for test sieves*” which is related to ISO 3310-1.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Rubber Standards Committee, was published under the authority of the Board of BSI and comes into effect on 30 September 1987
