National foreword

This Section of BS 6057 is identical with ISO 706:1985 “*Rubber latex — Determination of coagulum content (sieve residue)*”, published by the International Organization for Standardization (ISO). It supersedes BS 6057-3.8:1981, which is withdrawn.

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following. The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker. In British Standards it is current practice to use the symbol “mL” for millilitre rather than “ml”.

Wherever the words “International Standard” appear, referring to this standard, they should be read as “Section of BS 6057”.

The Technical Committee has reviewed the provisions of ISO 3310-1:1982, to which reference is made in the text, and has decided that they are acceptable for use in conjunction with this standard. A related British Standard to ISO 3310-1 is BS 410.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Rubber Standards Committee, was published under the authority of the Executive Board and comes into effect on 31 December 1987
