1 Scope	2	Index of terms	5

Foreword

This Part of BS 6100 has been prepared under the direction of the Basic Data and Performance Criteria for Civil Engineering and Building Structures Standards Policy Committee. It is a revision of BS 6100 : Part 0 : 1986, which is withdrawn.

To ensure coordination and consistency throughout the construction industry, a single British Standard, BS 6100, is being published to replace existing glossaries. This consists of several Parts that are in turn divided into Sections and, in some cases, into Subsections (see clause 5). This glossary is intended as a basic reference document providing a comprehensive list of terms that will promote better understanding between various sections of the construction industry, facilitate trade and provide better tools for improved handling of information. International work in this field has been taken into account.

Many of the definitions in this glossary are intended for general use whereas definitions in other standards are intended to clarify the meaning of terms in that particular standard. Legal definitions in a particular statute are for

the purposes of that statute and may be different from the definitions in this glossary.

This glossary has been structured so that general terms for basic concepts are grouped together to form a foundation on which more specialized terms are based. The most general terms will be found in BS 6100 : Part 1 : Section 1.0 with the more specialized terms forming individual Sections or Subsections of other Parts.

When existing British Standard glossaries are superseded by Sections or Subsections of this glossary, they will be withdrawn. The relationship between a Section or Subsection of this glossary and an existing glossary will be explained in the foreword to each Section or Subsection. The arrangement into Sections or Subsections allows international standards to be incorporated easily into the glossary.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

0 Introduction

The UK construction industry covers a wide range of people and skills and operates in many countries; it brings together many different developing technologies. Standardizing the formal language that the industry uses for instruction, specifications, orders, etc., helps to improve communications and avoid ambiguity. Previous glossaries in the construction industry have often been restricted to specialist fields and have largely been known and used only by specialists. The improvement effected by bringing these glossaries together will ensure they become more widely used throughout the industry and will raise the general level of awareness of the importance of using language correctly.

An important difference between dictionaries and glossaries is that the former describe all the idiosyncracies of everyday use of the word or phrase whereas a glossary attempts to eliminate the conflicts and prevent overlapping use. The conflicts are eliminated by looking for the central concepts implicit in the terms everybody uses. This can mean reducing the number of terms available for certain concepts, giving prominence to national terms over regional terms and in some cases, restricting the meaning of terms to narrower concepts than those in every day use. A greater precision of the language is achieved with a single term for each concept by an explicit relationship between terms and, where the glossary corresponds with an international standard, by a more precise relationship between the concepts and terms of another language.

Technological developments in the industry and in the way it is handling information require an up-to-date and more precise language. This glossary is intended as a step towards developing such a language, but from the outset it should assist both the reader of technical literature to understand the meaning of terms used and technical writers to use terms in their correct and up-to-date sense.

1 Scope

This Part of BS 6100 gives general information relevant to all Parts, Sections and Subsections of this glossary, background information, guidance on using the glossary, a list of the Sections and Subsections of the glossary and a general alphabetical index of those that have been published at the date of the publication of this Part.

NOTE. The titles of the publications referred to in this standard, except those British Standards that have been withdrawn, are listed on the inside back page.

2 Coverage of the glossary

This glossary covers all topics that are the responsibility of Standards Policy Committees that report to the Council for Building and Civil Engineering. Some subjects, although of interest to the construction industry, are the responsibility

of Standards Policy Committees reporting to other Councils and are therefore excluded from this glossary, e.g. timber preservations (BS 4261) and fire (BS 4422). However, any terms from them which are considered necessary for construction purposes will be repeated in this glossary, or relevant new terms recommended for inclusion in other glossaries, e.g. refrigeration, heating, ventilating and air conditioning (BS 5643).

On the other hand, certain subjects are included in this glossary that apply elsewhere and not only to construction. For example, timber and woodwork are covered, even though some of the terms are more relevant to the furniture, packaging and boat-building industries.

Terms that have no meaning special to the construction industry, e.g. testing, standardizing, have been excluded from this glossary. However, Scottish terms and important regional terms are included, either in their own right or as accepted alternatives to preferred terms. Local terms, where included, are given as deprecated equivalents of preferred terms.

The scope of each part of the glossary is established by taking the following into consideration:

- (a) the need to revise glossaries that have become out of date;
- (b) the need to respond to and dovetail with international work that covers similar ground;
- (c) the need to produce a Section or Subsection sufficiently independent to be useful to specialists who may be indifferent to the fact that it forms part of a larger glossary.

Terms and definitions in the following published glossaries were considered, or are at present under consideration, for inclusion in this glossary:

BS 565*; BS 892*; BS 2717*; BS 2787*; BS 2847*;
BS 2900*; BS 3519*; BS 3589*; BS 3827 : Part 1, Part 2,
Part 3 and Part 4; BS 3975* : Part 4 and Part 5; BS 4049†;
BS 4118†; BS 4340*; BS 4485 : Part 1; BS 4627*;
BS 4643*; BS 4949*; BS 5578 : Part 1*; BS 6914 : Part 1.

3 Structure of the glossary

This standard is divided into Parts and Sections and in some cases Subsections (see clause 5).

The index of terms included in this Part will be updated periodically as further Sections and Subsections are published.

Each Section and Subsection of the glossary includes a contents list, a foreword and an alphabetical index.

Guidance on the use of the glossary is given in the foreword, together with any information particular to that Section or Subsection, e.g. whether an existing standard is superseded and the relationship (if any) to international standards.

Within each Section or Subsection of the glossary, the terms are arranged in groups of associated terms (e.g. tools and equipment, properties). Each group is listed under an

* Now withdrawn.

† Now amended.

appropriate heading and, where relevant, the head term is repeated with its definition. In some cases, these groups are further divided into subgroups. The headings of both the groups and subgroups are given in the contents list of each Section or Subsection. Within each group or subgroup, the terms that are closely associated are arranged in a logical order; if there is no strong association, then the terms are arranged alphabetically.

NOTE. Supplementary information in the form of illustrations and displays of relationship between terms are given in some Sections and Subsections of the glossary.

As far as possible, the definitions in this glossary have been formulated in accordance with the recommendations of BS 3669 and in such a manner that each definition would still make sense if removed from its context.

4 Guidance for using the glossary

4.1 Term number

Each term is given a unique reference to its place in the glossary by means of a term number of seven digits. The term number consists of two parts, the first of three digits, the second of four. The first three digits represent the Part, Section and Subsection. The fourth digit represents the group of terms, the fifth digit represents the subgroup of terms and the last two digits represent the place within the subgroup. If there is no Subsection, group or subgroup, the relevant digit will be zero. The first part of the term number is common to all terms within a Section or Subsection of the standard.

The following shows the construction of the term number diagrammatically.

Example. 613 1204 represents

sixth Part
first Section
third Subsection
first group
second subgroup
fourth term (i.e. 04)

NOTE 1. The first Section of Part 6 is designated 6.1 for ease of reference.

NOTE 2. The indexes refer to the term number, not the page number.

4.2 Italicized words

Words that are defined elsewhere in the same document are italicized when they appear in a definition. Words identical with terms defined in that document but, which are used in a dictionary sense rather than as special construction terms, are not italicized.

4.3 Deprecated, regional and non-preferred terms

Deprecated, regional and non-preferred terms are given below the preferred term with their status indicated. They are not separately numbered, but all are listed in the index with a reference to the preferred term.

4.4 Repeated terms

Some terms may have more than one meaning. Where this occurs in different branches of the construction industry, the term will appear in different Sections or Subsections of the Glossary. In such cases the first three digits of the term number indicate the context; the term is listed for each alternative definition, e.g.:

grain 410 4101
grain 520 1506

This example indicates that 'grain' has two alternative definitions and appears both in Part 4 (Forest products) Section 4.1 (Characteristics and properties of timber and wood based panel products), and in Part 5 (Masonry) Section 5.2 (Stone).

Where the same term appears more than once in the same Section or Subsection but with different definitions, such terms are listed separately in the index of that Section or Subsection for each alternative definition with (1) (2), etc. to indicate that different definitions are given, e.g.:

jumper (1) 520 2212
jumper (2) 520 3105

Where a term with the same definition is repeated in different Sections or Subsections, the term is listed only once in the index with a reference to each term number, e.g.:

abutment 100 3134
210 6107

If a term is used both as a preferred term with one meaning, and as a deprecated term with a different meaning, the deprecated (dep.) term is indicated in the index, e.g.:

brick tile 530 2014
brick tile (dep.) 530 2013

A dagger (†) against a term number in the master index of terms in this Part of BS 6100 indicates a preferred definition that differs from the one agreed internationally and implemented in Section 1.0 General. Such general definitions have been developed further nationally for inclusion in more specialized Sections and Subsections of

the glossary during the time that has elapsed since they were agreed internationally. The preferred definitions will be included in the revision of Section 1.0 that will be issued after the publication of the second Part of the international vocabulary, ISO 6707.

4.5 Term inversion

Terms of more than one word, e.g. 'reinforced concrete' are written in a direct style, not as 'concrete, reinforced'. However, the inverted term will also be included in the index with a reference to the direct term.

4.6 Plural terms

In most cases terms are given in the singular, even when the plural form is more common.

5 Contents of the glossary

The following is a list of the proposed separately published Sections and Subsections of this Glossary, those already published being indicated by an asterisk (*):

*Part 0 Introduction

Part 1 General and miscellaneous

*Section 1.0 General

*Section 1.1 Types of buildings

*Section 1.2 Spaces

Section 1.3 Parts of construction works

Subsection 1.3.0 External works

*Subsection 1.3.1 Walls and claddings

*Subsection 1.3.2 Roofs and roofing

*Subsection 1.3.3 Floors and ceilings

*Subsection 1.3.4 Stairs and circulation elements

*Subsection 1.3.5 Doors, windows and openings

Subsection 1.3.6 Jointing products, hardware and accessories

Subsection 1.3.7 Finishes

Subsection 1.3.8 Signs and signing

Section 1.4 Materials

Subsection 1.4.1 Glazing

Section 1.5 Operations; associated plant and equipment

*Subsection 1.5.1 Coordination of dimensions; tolerances and accuracy

*Subsection 1.5.2 Jointing

*Subsection 1.5.3 Setting out and measurement

Subsection 1.5.5 Plant and equipment

*Subsection 1.5.6 Documentation excluding drawings

*Subsection 1.5.7 Drawings

*Section 1.6 Persons

Section 1.7 Characteristics and performance

*Subsection 1.7.1 Performance

*Subsection 1.7.2 Characteristics

Section 1.8 Environment and physical planning

Part 2 Civil engineering

*Section 2.1 Structural design and elements

Section 2.2 Substructures. Earthworks. Foundations. Tunnels

*Subsection 2.2.1 Earthworks and excavation

Subsection 2.2.2 Substructures

Subsection 2.2.3 Tunnels

*Section 2.3 Superstructures. Bridges, large span structures

Section 2.4 Highway and railway engineering

*Subsection 2.4.1 Highway engineering

*Subsection 2.4.2 Railway engineering

Section 2.5 Hydraulic engineering and construction work

Section 2.6 Natural waters. Inland. Coastal. Marine

*Section 2.7 Public health. Environmental engineering

Section 2.8 Pipelines. Ducts

Part 3 Services

*Section 3.1 Energy sources and distribution

Section 3.2 Internal communication and transport

*Subsection 3.2.1 Internal communication

*Subsection 3.2.2 Internal transport

Section 3.3 Sanitation

*Section 3.4 Lighting

Part 4 Forest products

*Section 4.1 Characteristics and properties of timber and wood based panel products

*Section 4.2 Sizes and quantities of solid timber

*Section 4.3 Wood based panel products

*Section 4.4 Carpentry and joinery

*Section 4.5 Cork

Part 5 Masonry

*Section 5.1 Terms common to masonry

*Section 5.2 Stone

*Section 5.3 Bricks and blocks

Part 6 Concrete and plaster

*Section 6.1 Binders

*Section 6.2 Concrete

*Section 6.3 Aggregates

*Section 6.4 Admixtures

*Section 6.5 Formwork

Section 6.6 Products, applications and operations

Subsection 6.6.1 Concrete and mortar

Subsection 6.6.2 Plaster

NOTE. This arrangement of the glossary makes it possible to add new Subsections, Sections or Parts or to revise existing Subsections and Sections at any time without affecting the rest of the glossary.
