Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the General Mechanical Engineering Standards Committee (GME/-) to Technical Committee GME/25, upon which the following bodies were represented:

- Association of Cycle Traders
- Bicycle Association of Great Britain
- British Cycling Federation
- British Rubber Manufacturers' Association
- Consumer Standards Advisory Committee of BSI
- Consumers' Association
- Cyclists' Touring Club
- Department of Transport (Highways)
- Institute of Trading Standards Administration
- Royal Society for the Prevention of Accidents
- Small Electrical Appliances Marketing Association
- Coopted member

This British Standard, having been prepared under the direction of the General Mechanical Engineering Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 March 1987

National foreword

This Part of BS 6102 has been prepared under the direction of the Mechanical Engineering Standards Committee and forms part of a series implementing corresponding international standards in the development of which the United Kingdom has played an active part.

This Standard is identical with ISO 8488:1986 “*Cycles — Screw threads used to assemble head fittings on bicycle forks*” prepared by Technical Committee ISO/TC 149, Cycles, of the International Organization for Standardization (ISO).

Terminology and conventions. The text of the international standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” appear, referring to this standard, they should be read as “Part of BS 6102”.

Cross-references

International standard	Corresponding British Standard
ISO 68:1973	BS 3643 ISO metric screw threads Part 1:1981 Principles and basic data (Technically equivalent)
ISO 965-1:1980	
ISO 1502:1978	BS 919 Screw gauge limits and tolerances Part 3:1968 Gauges for ISO metric screw threads (Technically equivalent)

The Technical Committee has reviewed the provisions of ISO 6692, to which reference is made in the text, and has decided that they are acceptable for use in conjunction with this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
