Cooperating organizations

The Road Engineering Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following:

- Asphalt and Coated Macadam Association
- Association of Consulting Engineers
- British Quarrying and Slag Federation
- British Tar Industry Association
- Cement and Concrete Association
- Concrete Society Limited
- Contractors Plant Association*
- Convention of Scottish Local Authorities
- County Surveyors' Society
- Department of the Environment (PSA)
- Department of the Environment (Transport and Road Research Laboratory)
- Department of Transport
- Federation of Civil Engineering Contractors*
- Federation of Manufacturers of Construction Equipment and Cranes*
- Greater London Council
- Institute of Petroleum
- Institute of Quarrying
- Institution of Civil Engineers*
- Institution of Highway Engineers*
- Institution of Municipal Engineers
- Institution of Structural Engineers
- Ministry of Defence*
- Refined Bitumen Association Ltd.
- Road Emulsion Association Ltd.
- Road Surface Dressing Association
- Sand and Gravel Association Limited
- Society of Chemical Industry
- Trades Union Congress*

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the Technical Committee entrusted with the preparation of this British Standard:

- Associated Offices Technical Committee
- Department of Industry
- Health and Safety Executive
- National Coal Board

This British Standard, having been prepared under the direction of the Road Engineering Standards Committee, was published under the authority of the Executive Board and comes into effect on 29 May 1981

National foreword

This British Standard has been prepared under the direction of the Road Engineering Standards Committee and is identical with ISO 6483:1980 “*Earth-moving machinery — Dumper bodies — Volumetric rating*”, published by the International Organization for Standardization (ISO).

ISO 6483 was produced as a result of international discussions in which the United Kingdom took an active part.

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is especially drawn to the following.

Where the words “International Standard” appear, referring to this standard, they should be read as “British Standard”.

The comma has been used throughout as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Cross reference. There is no corresponding British Standard for ISO 7132 “*Earth-moving machinery — Dumpers — Terminology*” (in preparation). The technical committee has reviewed the provisions of this International Standard at the draft stage and has decided that they are acceptable for use in conjunction with this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
