Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Building Services Standards Committee (SEB/-) to Technical Committee SEB/3, upon which the following bodies were represented:

- British Bath Manufacturers' Association
- British Plastics Federation
- Consumer Standards Advisory Committee of BSI
- Council of British Ceramic Sanitaryware Manufacturers
- Department of the Environment (Property Services Agency)
- Greater London Council
- Institute of Plumbing
- Institution of Environmental Health Officers
- Institution of Public Health Engineers
- National Brassfoundry Association
- Plastic Bath Manufacturers' Association
- Royal Institute of British Architects
- Water Companies Association

This British Standard, having been prepared under the direction of the Building Services Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 January 1985

Foreword

This Part of BS 6340 has been prepared under the direction of the Building Services Standards Committee and was initiated by the Consumer Standards Advisory Committee of BSI, a need for such a standard having been indicated by various interested organizations.

The standard is being published in the following Parts:

- *Part 1: Guide on choice of shower units and their components for use in private dwellings;*
- *Part 2: Specification for the installation of shower units;*
- *Part 3: Specification for prefabricated shower enclosures¹⁾;*
- *Part 4: Specification for shower heads and related equipment;*
- *Part 5: Specification for prefabricated shower trays made from acrylic material;*
- *Part 6: Specification for prefabricated shower trays made from porcelain enamelled cast iron;*
- *Part 7: Specification for prefabricated shower trays made from vitreous enamelled sheet steel;*
- *Part 8: Specification for prefabricated shower trays made from glazed ceramic.*

The specifications for shower trays made of different materials are in separate Parts (5 to 8) so that if the proposed CEN work on shower trays is proceeded with and the final documents are acceptable to the UK, they can supersede the relevant Parts of this standard.

Similarly, the waste outlet hole dimensions are specified in line with current UK practice but are given in Appendix A so that, if the final documents on waste hole dimensions being produced in CEN are acceptable to the UK, that appendix can be superseded by the latter documents.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

¹⁾ In preparation.
