National foreword

This Part of BS 6347 has been prepared under the direction of the Agricultural Machinery and Implements Standards Committee. It is identical with ISO 789-2 “*Agricultural tractors — Test procedures — Part 2: Hydraulic power and lifting capacity*”, which was developed by Technical Committee ISO/TC 23, Tractors and machinery for agriculture and forestry, and was published in 1983 by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “this part of ISO 789” appear, referring to this standard, they should be read as “this Part of BS 6347”.

Cross-references. The Technical Committee has reviewed the provisions of ISO 730-1, ISO 730-2 and ISO 3448 to which reference is made in the text, and has decided that they are acceptable for use in conjunction with this Standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
