Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee AGE/15, Equipment for crop protection, upon which the following bodies were represented:

- Agricultural Engineers' Association
- British Agrochemicals Association Ltd.
- British Crop Protection Council
- British Plastics Federation
- Health and Safety Executive
- Imperial College of Science and Technology
- Long Ashton Research Station
- Ministry of Agriculture, Fisheries and Food
- National Farmers' Union
- Silsoe Research Institute

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 November 1996

Foreword

This Part of BS 6356 has been prepared by Technical Committee AGE/15.

This standard is intended to enhance levels of safety for agricultural operators.

This standard is applicable to most systems designed for the transfer of liquid plant protection products from their original container into the application equipment with the minimum risk to operator safety or of environmental contamination.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
