Foreword

This Part of this British Standard has been prepared under the direction of the Elements and Components (of Diverse Materials) for Buildings Standards Committee.

BS 1246 "*Metal skirtings, picture rails and beads*", was withdrawn in 1972. This Part of this standard reintroduces requirements in respect of galvanized steel beads for plastering and dry lining. The need for further Parts covering beads in other materials is under consideration.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
