# Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Mechanical Engineering Standards Committee (MEE/-) to Technical Committee MEE/59 upon which the following bodies were represented:

- City of Birmingham Polytechnic
- Department of Industry (British Calibration Service)
- Department of Industry (National Physical Laboratory)
- Gauge and Tool Makers' Association
- Institution of Production Engineers
- Ministry of Defence
- Coopted member

This British Standard, having been prepared under the direction of the Mechanical Engineering Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 January 1984

## Foreword

This British Standard has been prepared under the direction of the Mechanical Engineering Standards Committee and is one of a series of specifications for engineers' measuring tools. In particular, external micrometers are dealt with in BS 870, internal and stick micrometers in BS 959 and micrometer heads in BS 1734.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

**Compliance with a British Standard does not of itself confer immunity from legal obligations.**

### Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
