Foreword

This British Standard, which is one of a series relating to the testing of pulp, paper and board, has been prepared under the direction of the Paper Standards Committee. It is based on work done by the precursor of the Test Method Committee of the Technical Division of the British Paper and Board Industry Federation and was published as Proposed Procedure No 59.

The procedure described in this British Standard is at present under consideration by the relevant technical committee of the International Organization for Standardization (ISO) and may eventually be adopted as an International Standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
