

Measurement of hygroexpansivity of paper and board —

Part 1: Method for the measurement of
hygroexpansivity up to a maximum
relative humidity of 68 %

Confirmed
April 2010

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee PAI/11, Methods of test for paper, board and pulps, upon which the following bodies were represented:

- British Carton Association
- British Fibreboard Packaging Association
- British Printing Industries Federation
- British Textile Confederation
- Envelope Makers' and Manufacturing Stationers' Association
- Her Majesty's Stationery Office
- Institute of Paper Conservation
- Pira International
- Post Office
- The Paper Federation of Great Britain
- University of Manchester (Institute of Science and Technology)
- Coopted members

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 May 1995
