

Operation and maintenance of earth-moving machinery —

Part 14: Specification for lubrication fittings — Grease-gun nozzles

ICS 53.100

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee B/513, Construction equipment and plant, and site safety, to Subcommittee B/513/1, Earth-moving machinery, upon which the following bodies were represented:

- British Coal Corporation
- Construction Plant (Hire Association)
- Federation of Civil Engineering Contractors
- Federation of Manufacturers of Construction Equipment and Cranes
- Health and Safety Executive
- Institution of Civil Engineers
- Silsoe Research Institute

This British Standard, having been prepared under the direction of the Sector Board for Building and Civil Engineering, was published under the authority of the Standards Board and comes into effect on 15 June 1997

National foreword

This Part of BS 6913 has been prepared by Subcommittee B/513/1. It is identical with ISO 6392-2:1996 *Earth-moving machinery — Lubrication fittings — Part 2: Grease-gun nozzles* published by the International Organization for Standardization (ISO).

ISO 6392-2 was prepared by Subcommittee 3, Operation and maintenance, of ISO Technical Committee 127, Earth-moving machinery, with the active participation and approval of the UK. This text represents a revision, in Parts, of ISO 6392:1980. The other Part, ISO 6392-1 *Earth-moving machinery — Lubrication fittings — Nipple type* is being published in the UK as BS 6913-13:1997.

The previous edition of the British Standard was published as BS 6060:1981 which has been withdrawn.

Cross-reference

International Standard	Corresponding British Standard
	BS 6914 <i>Terminology (including definitions of dimensions and symbols) for earth-moving machinery</i>
ISO 6165:1987 ^a	Part 1:1988 <i>Glossary of terms for basic types of earth-moving machinery</i> (Identical)

^a Currently under revision.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, page ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
