This Part of BS 7012 has been prepared under the direction of the Laboratory Apparatus Standards Committee. It is identical with ISO 8040:1986 “*Optics and optical instruments — Microscopes — Connecting dimensions of tube slides and tube slots*”, published by the International Organization for Standardization (ISO). ISO 8040 was prepared by Subcommittee 5, Microscopes, of Technical Committee ISO/TC 172, Optics and optical instruments, with the active participation and approval of the UK.

The Parts of this standard are listed in Part 0.

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” appear, referring to this standard, they should be read as “Part of BS 7012”.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Laboratory Apparatus Standards Committee, was published under the authority of the Board of BSI and comes into effect on 28 February 1989
