Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Refractory Products Standards Policy Committee (RPM/-) to Technical Committee RPM/13, upon which the following bodies were represented:

- British Ceramic Research Ltd.
- British Industrial Ceramic Manufacturers' Association
- British Metallurgical Plant Constructors' Association
- Department of Trade and Industry (National Physical Laboratory)
- Electricity Supply Industry in England and Wales
- GAMBICA (BEAMA Ltd.)
- Institute of Refractories Engineers
- Refractories Association of Great Britain
- Rolls-Royce Limited
- United Kingdom Atomic Energy Authority
- University of Manchester

This British Standard, having been prepared under the direction of the Refractory Products Standards Policy Committee, was published under the authority of the Board of BSI and comes into effect on 28 February 1990

Foreword

This Section of BS 7134 has been prepared under the direction of the Refractory Products Standards Policy Committee. It is one of a series of Sections describing the testing of ceramics used in the engineering industry.

This Section is to be read in conjunction with BS 7134-0 “*Introduction and guide to sampling*” which describes the type of products which may be tested and also lists the Parts and Sections of BS 7134.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
