

Classification of refractories —

Part 2: Unshaped refractory products —

Section 2.2 Basic products

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Refractory Products Standards Policy Committee (RPM/-) to Technical Committee RPM/11, upon which the following bodies were represented:

- British Cement Association
- British Ceramic Research Ltd.
- British Steel Industry
- Refractories Association of Great Britain
- Society of Glass Technology

This British Standard, having been prepared under the direction of the Refractory Products Standards Policy Committee, was published under the authority of the Board of BSI and comes into effect on 31 August 1990

Foreword

This British Standard has been prepared under the direction of the Refractory Products Standards Policy Committee. It is one of a series of classifications for refractory products currently in preparation, which will be published as a series of Sections of BS 7225.

The purpose of this classification is to provide uniform designations, which can be used in the description of unshaped refractory products. Nothing in this British Standard should be taken as a specification for unshaped refractories, or as indicating their suitability for any particular applications.

Appendix A gives a coding system which may be used for abbreviated reference to the class limits.

The following Parts of BS 7225 have been published or are being prepared for publication.

- *Part 1: Shaped refractory products;*
- *Section 1.1: Insulating products;*
- *Section 1.2: Alumina, silica and alumino-silicate products;*
- *Section 1.3: Basic products containing less than 7 % carbon;*
- *Section 1.4: Basic products containing more than 7 % carbon;*
- *Section 1.5: Special products;*
- *Part 2: Unshaped refractory products;*
- *Section 2.1: Alumina, silica and alumino-silicate products;*
- *Section 2.3: Special products;*
- *Part 3: Ceramic fibre products;*
- *Section 3.1: Blankets, mats, felts and paper.*

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
