The Surface Coatings (other than Paints) Industry Standards Committee, under whose supervision this British Standard was prepared, consists of representatives from the following Government departments and scientific and industrial organizations:

- Aluminium Federation
- Assay Offices Committee of Great Britain
- Association of Metal Sprayers
- British Bolt, Nut, Screw and Rivet Federation
- British Electrical and Allied Manufacturers' Association
- British Jewellers' Association
- British Non-ferrous Metals Research Association*
- British Steel Industry*
- Chemical industries Association
- Cycle and Motor Cycle Association Ltd.
- Department of Trade and Industry*
- Electricity Council, the Central Electricity Generating Board and Area Boards in England and Wales*
- Electronic Engineering Association*
- Engineering Equipment Users' Association
- Greater London Council
- Institute of Metal Finishing*
- Institute of Sheet Metal Engineers
- Institute of Vitreous Enamellers
- Metal Finishing Association
- Ministry of Defence, Army Department*
- Ministry of Defence, Navy Department
- Society of Motor Manufacturers and Traders Limited*
- Tin Research Institute
- Vitreous Enamel Development Council
- Zinc Development Association*

The Government Departments and scientific and industrial organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

- British Constructional Steelwork Association
- British Lock and Latch Manufacturers' Association
- British Malleable Tube Fittings Association
- British Metal Finishing Suppliers' Association
- British Railways Board
- Department of the Environment
- Electric Cable Makers' Confederation
- Galvanizers' Association
- Institution of Corrosion Technology
- Institute of Engineering Inspection
- Institute of Iron and Steel Wire Manufacturers
- Post Office
- Spring Research Association

This British Standard, having been approved by the Surface Coatings (other than Paints) Industry Standards Committee, was published under the authority of the Executive Board on 28th May, 1971.

Foreword

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 9,000, fully indexed and with a note of the contents of each, will be found in the BSI Catalogue which may be purchased from BSI Sales Department. The Catalogue may be consulted in many public libraries and similar institutions.

This standard makes reference to the following British Standards:

BS 4360, *Weldable structural steels*.

BS 4479, *Recommendations for the design of metal articles that are to be coated*.

BS 4652, *Metallic zinc-rich priming paint*.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 7 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
