National foreword

This British Standard has been prepared under the direction of the Health Care Standards Policy Committee. It is identical with ISO 9997:1990 “*Dental cartridge syringes*”, prepared within Technical Committee 106, “Dentistry”, of the International Organization for Standardization (ISO) with the active participation of the UK.

An introduction is included in ISO 9997:1990 which is as follows:

“This International Standard specifies requirements for dental cartridge syringes with ISO metric threads only. However, attention is drawn to the existence of a variety of syringes with Imperial threads. Manufacturers currently producing syringes with Imperial threads are requested to change to ISO metric threads and 1992 has been set as a target date.”

In 1992 the European Committee for Standardization (CEN) accepted ISO 9997:1990 as European Standard EN 29997:1992.
