Table B.2 — Information relative to defects	6

National foreword

This British Standard has been prepared under the direction of the Electrotechnical Sector Board. It is identical with IEC 61318:1994, *Live working — Guidelines for quality assurance plans*, including Corrigendum April 2000, published by the International Electrotechnical Commission (IEC).

It is being published as a guide at the request of the British Technical Committee PEL/78, Tools for live working, as they support the International Technical Committee (TC 78) view that there is a need for a prospective standard to provide additional information to support the BS EN ISO 9000 series.

The international standard (IEC 61318) is a technical report type 2 and will be reviewed before August 1997 with the option of either:

- a) authorizing the extension of this publication for a further 3 years;
- b) conversion to a full standard; or
- c) withdrawal.

If any recipient of this document has any constructive comments on how it can be improved, they are requested to inform the secretary of PEL/78 by letter or fax.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

The Technical Committee has reviewed the provisions of IEC 410:1973, to which normative reference is made in the text, and has decided that they are acceptable for use in conjunction with this standard. There is no equivalent British Standard. International standards may be purchased from Customer Services, BSI.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.
