National foreword

This Part of BS 7605 has been prepared under the direction of the Agricultural Machinery and Implements Standards Policy Committee. It is identical with ISO 9260:1991 *Agricultural irrigation equipment — Emitters — Specification and test methods* published by the International Organization for Standardization (ISO).

ISO 9260 was prepared by Subcommittee SC 18, Irrigation and drainage equipment and systems, of ISO Technical Committee 23, Tracks and machinery for agriculture and forestry.

Cross-references

The Technical Committee has reviewed the provisions of ISO 3501:1976 and ISO 8779¹⁾ to which normative reference is made in the text and has decided that they are acceptable for use in conjunction with this standard. A related British Standard to ISO 3501 is BS 5114:1975 *Specification for performance requirements for joints and compression fittings for use with polyethylene pipes*.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
