

Specification for

Low-voltage pole-mounting fuses (cut-outs) — 400 A rating

ICS 29.120.50

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Power Electrical Engineering Standards Policy Committee (PEL/-) to Technical Committee PEL/10, upon which the following bodies were represented:

ASTA Certification Services
Association of Control Manufacturers TACMA (BEAMA Ltd.)
Association of Manufacturers Allied to the Electrical and Electronic Industry (BEAMA Ltd.)
British Industrial Truck Association
ERA Technology Ltd.
Electrical Installation Equipment Manufacturers' Association (BEAMA Ltd.)
Electricity Association
Electronic Components Industry Federation
Engineering Equipment and Materials Users' Association GAMBICA (BEAMA Ltd.)
Health and Safety Executive
Institution of Electrical Engineers

This British Standard, having been prepared under the direction of the Power Electrical Engineering Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 June 1993

Foreword

This British Standard is published by BSI Standards Limited, under licence from The British Standards Institution.

BS 7656:1993+A1:2013 supersedes BS 7656:1993, which is withdrawn.

This British Standard has been prepared under the direction of the Power Electrical Engineering Standards Policy Committee. It is based on the Electricity Association Technical Specification 12-20, and has been updated to reflect current practice and standards. This standard was originally submitted to CENELEC under the Vilamoura Procedure, but in the absence of interest by other national committees, it was derogated to the UK for publication as a national standard.

This standard is to be read in conjunction with BS EN 60947-1:2007+A1:2011 and therefore for ease of cross-reference it has clause numbering following the style of BS EN 60947-1:2007+A1:2011.

Subclauses, tables or figures which are additional to those in BS EN 60947-1:2007+A1:2011 are numbered starting from Figure 101.

Text introduced or altered by Amendment No. 1 is indicated in the text by tags **A1** **A1**. Minor editorial changes are not tagged.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i to iv, pages 1 to 10, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
