

Reciprocating internal combustion engine driven alternating current generating sets —

Part 12: Emergency power supply to safety services

ICS 27.020; 29.160.40

National foreword

This British Standard reproduces verbatim ISO 8528-12:1997 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee MCE/14, RIC engines, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 9 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments
10414	May 1999	Front cover

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 February 1998

Foreword	iii
1 Scope	1
2 Normative references	1
3 Definitions	1
4 Symbols	2
5 Additional regulations and requirements	2
6 Classification designation	2
6.1 General	2
6.2 Typical examples of classification	2
7 Generating set design	3
7.1 Criteria for determining the required power	3
7.2 Power determination	3
7.3 Operating limit values	3
8 Additional requirements	4
9 Controlgear and switchgear	5
9.1 Protection, measurement, monitoring and control equipment for the generator	5
9.2 Engine measurement and monitoring equipment	5
9.3 Generating set measurement and monitoring equipment	5
9.4 Remote signals	5
10 Test mode	5
10.1 Test operation with synchronization to the mains supply	5
10.2 Test mode without mains synchronization	6
11 Testing	6
11.1 General	6
11.2 Installation tests	6
11.3 Periodic tests	7
12 Rating plate	7
13 Required documentation	7
14 Check list	7
Annex A (informative) Bibliography	9
Table 1 — Classification by change-over time	2
Table 2 — Examples	2
Table 3 — Special requirements for examples given in Table 2	3
Table 4 — Design considerations for power generators	8

Descriptors: Motor generator sets, emergency electrical installations, electric power supply, specifications, performance.
