Foreword

This Part of BS 770 has been prepared under the direction of the Dairying Standards Committee. It supersedes the method for determination of nitrogen given in clause 7 of BS 770:1963. Other new Parts of BS 770 supersede the remaining methods given in BS 770:1963 and that standard is therefore withdrawn.

The method described in this Part differs from the previous method chiefly in the use of copper sulphate rather than mercuric oxide or mercuric sulphate solution as the catalyst and in the use of boric acid as the collecting agent.

A collaborative study organized on behalf of the committee established the precision values for the method as given in clause 9.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 and 2, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Dairying Standards Committee, was published under the authority of the Board of BSI and comes into effect on 30 January 1987
