

Soil quality —

Part 4: Biological methods —

Section 4.3 Effects of pollutants on soil flora —

Subsection 4.3.2 Method for measuring the effects of chemicals on the emergence and growth of higher plants

ICS 13.080

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee EH/4, Soil quality, to Subcommittee EH/4/4, Biological methods, upon which the following bodies were represented:

- Association of Consulting Scientists
- Association of County Councils
- British Society of Soil Science
- British Wood Preserving and Damp-proofing Association
- Landscape Institute
- Macaulay Land Use Research Institute
- Soap and Detergent Industry Association
- Society of Chemical Industry
- Society of Environmental Toxicology and Chemistry
- University of East London
- University of Southampton
- Water Research Centre

This British Standard, having been prepared under the direction of the Health and Environment Sector Board, was published under the authority of the Standards Board and comes into effect on 15 June 1996

National foreword

This Subsection of BS 7755 has been prepared by Subcommittee EH/4/4 and is identical with ISO 11269-2:1995 *Soil quality — Determination of the effects of pollutants on soil flora — Part 2: Effects of chemicals on the emergence and growth of higher plants*, published by the International Organization for Standardization (ISO).

ISO 11269-2 was prepared by Subcommittee 4, Biological methods, of Technical Committee ISO/TC 190, Soil quality, with the active participation and approval of the UK.

BS 7755 is being published in a series of Parts subdivided into Sections and Subsections that will generally correspond to particular International Standards. Other Parts of BS 7755 are, or will be, as follows.

- *Part 1: Terminology and classification;*
- *Part 2: Sampling;*
- *Part 3: Chemical methods;*
- *Part 4: Biological methods;*
- *Part 5: Physical methods.*
