Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Materials and Chemicals Sector Policy and Strategy Committee (I/-) to Technical Committee CII/2, upon which the following bodies were represented:

- Chemical Industries Association
- Ministry of Defence
- Royal Society of Chemistry
- Society of British Aerospace Companies Limited
- Society of Environmental Engineers

This British Standard, having been prepared under the direction of the Materials and Chemicals Sector Policy and Strategy Committee, was published under the authority of the Standards Committee and comes into effect on 15 November 1999

Foreword

This British Standard has been prepared by Technical Committee CII/2.

BS 2541:1960, which covered activated aluminium for use as a desiccant, was withdrawn in 1993. The methods of test given in the 1960 edition were replaced with parts of BS 3482, for use in association with BS 2540, *Specification for granular desiccant silica gel*, BS 3532, *Specification for granular desiccant silica gel impregnated with cobalt chloride* and BS 7554, *Specification for beaded silica gel*. It was expected that the specification for beaded desiccant activated alumina was no longer required, but it has become necessary to prepare a new standard to reflect current industrial needs.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 and 2, an inside back cover and a back cover.
