Cooperating organizations

The Refrigeration, Heating and Air Conditioning Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following:

Association of Manufacturers of Domestic Electrical Appliances	Electricity Supply Industry in England and Wales*
Association of Consulting Engineers	Engineering Equipment Users' Association
Boiler and Radiator Manufacturers Association Limited	Heating and Ventilating Contractors' Association
British Combustion Equipment Manufacturers' Association*	Hevac Association
British Gas Corporation	Institute of Energy*
British Refrigeration and Air Conditioning Association	Institute of Refrigeration
Building Services Research and Information Association	Institution of Gas Engineers
Chartered Institution of Building Services*	Lloyd's Register of Shipping
Department of Energy (Energy Technology)	Manufacturers Association of Radiators and Convector Ltd.
Department of the Environment (PSA)*	Ministry of Defence
Department of Health and Social Security	National Coal Board
	Society of British Gas Industries
	Water-tube Boilermakers' Association*

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the Technical Committee entrusted with the preparation of this British Standard:

Associated Offices Technical Committee	Fire Protection Association
Association of Shell Boilermakers	Greater London Council
British Tar industry Association	Health and Safety Executive
Cbmpe	Home Office
Chief and Assistant Chief Fire Officers Association	Institution of Fire Engineers
Dobeta Limited	Oil Companies Materials Association
Engineering Industries Association	Process Plant Association
Fire Offices Committee	Individual expert

This British Standard, having been prepared under the direction of the Refrigeration, Heating and Air Conditioning Standards Committee, was published under the authority of the Executive Board and comes into effect on 30 April 1981

Foreword

This publication, prepared under the direction of the Refrigeration, Heating and Air Conditioning Standards Committee, forms Part 3 of the British Standard on oil burning equipment and deals with atomizing burners up to 36 litres per hour. It was first published in 1970 and was amended in 1974.

Because ISO 3544 has been published as a dual numbered standard as BS 799-6, the contents of the 1970 edition of Part 3 that are now covered by Part 6 have been omitted in this revision.

Where information is required relating to the installation of the types of oil burner covered by this standard, reference should be made to code of practice BS 5410-1 or BS 5410-2 as appropriate.

The title of the 1970 edition included the term “associated equipment”. “Associated equipment” is now dealt with in other British Standards including BS 799-5, BS 4876, BS 5410-1 and BS 5410-2, and BS 4256-1, BS 4256-2 and BS 4256-3.

Certification. Attention is drawn to the certification facilities described on the inside back cover of this standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
