Co-operating organizations

The Electrical Industry Standards Committee under whose supervision this British Standard was prepared consists of representatives from the following Government departments and scientific and industrial organizations:

Associated Offices Technical Committee	Electric Cable Makers' Confederation*
Association of Consulting Engineers	Electrical Contractors' Association*
Association of Manufacturers of Domestic Electrical Appliances	Electrical Contractors' Association of Scotland
Association of Mining Electrical and Mechanical Engineers	Electrical Research Association
Association of Supervisory and Executive Engineers	Electricity Council, the Central Electricity Generating Board and the Area Boards in England and Wales*
British Electrical and Allied Manufacturers' Association*	Electronic Engineering Association
British Electrotechnical Approvals Board for Household Equipment	Engineering Equipment Users' Association
British Radio Equipment Manufacturers' Association	Institution of Electrical Engineers
British Railways Board	Institution of Electrical and Electronics Technician Engineers
British Steel Corporation	Lighting Industry Federation Limited
Crown Agents for Oversea Governments and Administrations	Ministry of Defence
Department of Employment (HM Factory Inspectorate)	National Inspection Council for Electrical Installation Contracting
Department of the Environment	National Physical Laboratory (Department of Trade and Industry)
Department of Trade and Industry	Oil Companies Materials Association
	Post Office
	South of Scotland Electricity Board

The scientific and industrial organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

Association of Manufacturers Allied to the Electrical and Electronic Industry	Electrical Installation Equipment Manufacturers Association
British Ship Research Association	Ministry of Defence, Navy Department
Copper Development Association	Telecommunication Engineering and Manufacturing Association Ltd

This British Standard, having been approved by the Electrical Industry Standards Committee, was published under the authority of the Executive Board on 19 November 1973

Foreword

This British Standard has been prepared under the authority of the Electrical Industry Standards Committee and is based on proposals submitted by the British Electrical and Allied Manufacturers' Association.

In preparing this revision, the distinction made in the 1954 edition between sockets designed for cables of specified size and sockets designed for specified currents has been eliminated. Consequent upon this change no attempt is now made to relate socket dimensions, cable size and current rating because current rating figures are entirely dependent upon particular conditions of installation and operation and can be meaningless when quoted out of that context.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
