

Rules for the preparation of
Detail specifications for

Lead-screw actuated preset potentiometers of assessed quality

Foreword

This British Standard, which has been prepared under the authority of the Telecommunication Industry Standards Committee gives the specific rules for the preparation of detail specifications for lead-screw actuated pre-set potentiometers of assessed quality and should be read in conjunction with Section 2 of BS 9130 “*Potentiometers of assessed quality: Generic data and methods of test*”.

It has been issued in the United Kingdom, where it is urgently required but if a similar procedure is adopted in other countries changes will be considered for the purposes of harmonization.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication
