Committees responsible for this British Standard

The publication of this British Standard was entrusted by the Power Electrical Engineering Standards Committee (PEL/-) to Technical Committee PEL/45, upon which the following bodies were represented:

- British Telecommunications plc
- ERA Technology Ltd.
- Electric Cable Makers' Confederation
- Electrical Installation Equipment Manufacturers' Association (BEAMA Ltd.)
- Electricity Supply Industry in England and Wales
- Institution of Electrical Engineers
- National Inspection Council for Electrical Installation Contracting
- Water Companies Association

This British Standard, having been prepared under the direction of the Power Electrical Engineering Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 January 1986

© BSI 01-1999

First published August 1940
First revision February 1948
Second revision January 1986

Foreword

This British Standard has been prepared under the direction of the Power Electrical Engineering Standards Committee. It supersedes BS 951:1948, which is withdrawn.

This revision takes into account the requirements of the 15th edition of the “Regulations for Electrical Installations” issued by the Institution of Electrical Engineers. Particular attention is drawn to Chapter 54 of these regulations dealing with earthing arrangements and protective conductors and to Section 527 dealing with joints and terminations.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
