National foreword

This British Standard has been prepared under the direction of the Electronic Components Standards Policy Committee (ECL/-). It is identical with CECC 00108 'Rule of Procedure 8. Attestation of conformity', 2nd edition, published by the European Committee for Electrotechnical Standardization (CENELEC) Electronic Components Committee (CECC).

This standard prescribes information relating to the CECC Mark of Conformity and Certificate of Conformity. The granting of a Mark of Conformity or a Certificate of Conformity attests that the components conform with the requirements of the detail specification concerned.

Cross-references

The Electronic Components Standards Policy Committee has reviewed the provisions of CECC 00107¹⁾ to which reference is made in the text and has decided that it is acceptable for use in conjunction with this standard.

The British Standard which implements the CECC Rules of Procedure is BS 9000 'General requirements for a system for electronic components of assessed quality' Part 2 : 1991 'Specification for the national implementation of the CECC System'.

NOTE. 2.1 of this specification makes reference to § 5.2.6 of RP 11. RP 11 has been revised since the publication of CECC 00108, 2nd edition, and reference should be made to the 'Cross reference list for main clauses' contained in annex A of BS CECC 00111 : Part 1 : 1991.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

¹⁾It is not intended to adopt CECC 00107 as a British Standard.
