National foreword

This British Standard is the English language version of BS CECC 299001:1999. It is identical with CECC 299001:1999.

The UK participation in its preparation was entrusted by Technical Committee EPL/46, Cables, wires, waveguides, RF connectors and accessories for communication and signalling, to Subcommittee EPL/46/2, RF connectors, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

Attention is drawn to the fact that CEN and CENELEC Standards normally include an annex which lists normative references to international publications with their corresponding European publications. The British Standards which these implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the CECC title page, pages 2 to 16 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Electrotechnical Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 November 1999

Technology Approval Schedule: Manufacture of electrical connectors

Up-to-date lists and bibliographical references of other Technology Approval Schedules may be obtained on application to the Central Secretariat or to any CENELEC member.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

CENELEC

European Committee for Electrotechnical Standardization
Comité Européen de Normalisation Electrotechnique
Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: rue de Stassart 35, B-1050 Brussels

Foreword

This Technology Approval Schedule was prepared by DRA/PCS, connector manufacturers/users and CECC connector sub-committees. The document has been adopted and accepted by the Technical Committees CENELEC TC 46D, RF connectors and CENELEC TC 48B, LF connectors.

The responsible ONC is the CECC Manager at BSI, who may be contacted at:

British Standards Institution
Electrical, Fire and Health Department
289, Chiswick High Road
London W4 4AL
England
Tel: 0181 996 9000

It is based wherever possible, on Publications of the International Electrotechnical Commission, the International Standards Organisation and existing publications of the CECC.

Contents

		Page		Page
Foreword		2	6.2 Description of activities and flow charts	12
Introduction		4	6.3 Equipment	12
1 General		4	6.4 Test procedures	12
1.1 Scope		4	6.5 Interrelationships	12
1.2 Related documents		4	6.5.1 Subcontracting	12
1.3 Units, symbols and technology		4	6.5.2 Verification of customer specification	12
1.4 Standard and preferred values		4	7 Verification and test vehicles	14
1.5 Definitions		4	7.1 Process boundary verification	14
2 Definition of the component technology		5	7.2 Product verification	14
2.1 Scope		5	8 Process characterisation	14
2.2 Description of activities and flow charts		5	8.1 Identification of process characteristics	14
2.3 Technology abstract		5	8.2 Description of activities and flow charts	14
3 Component design		5	9 Primary packaging and shipment	14
3.1 Scope		5	9.1 Description of activities and flow charts	14
3.2 Description of activities and flow charts		5	9.2 Interrelationships	15
3.3 Interrelationships		5	9.2.1 Verification of customer requirements	15
3.3.1 Design manufacture		5	9.2.2 Subcontracting	15
3.3.2 Customer/user		8	9.3 Validity of release	15
3.3.3 Subcontractors, vendors and internal suppliers		8	10 Withdrawal of Technology Approval	15
4 Piece-part manufacture		8	Annex A Example abstract of Technology Approval	16
4.1 Scope		8	Figure 1 — Example flow chart — Design/manufacturer/test	6
4.2 Description of activities and flow charts		8	Figure 2 — Example flow chart — Design	7
4.3 Materials, inspection and handling		8	Figure 3 — Example flow chart — Piece-part manufacturer	9
4.4 Equipment		8	Figure 4 — Example flow chart — Connector assembly	11
4.5 Rework		8	Figure 5 — Example flow chart — Testing of connectors	13
4.6 Validation and control of the process(es)		10		
4.7 Subcontracting		10		
5 Assembly		10		
5.1 Scope		10		
5.2 Description of activities and flow charts		10		
5.3 Materials, inspection and handling		10		
5.4 Equipment		10		
5.5 Rework		10		
5.6 Validation and control of the process(es)		10		
5.7 Subcontracting		10		
6 Testing		12		
6.1 Scope		12
